

## WHAT CAN YOU MOVE WITHIN ECE LINERS?

[www.eceplast.it](http://www.eceplast.it)

LDPE film Liners allow for the transportation in containers of solid, dry bulk products for chemical, food and mineral industries, as well as the disposal of residue sludge and ash from industrial and organic processes, guaranteeing lower logistical and transportation costs.

*Bulk products.*

<b>Chemicals</b>	<b>Foodstuffs</b>	<b>Minerals</b>
ABS resin	barley	anhydrite binder
aluminium powder	cattle feed	bentonite clay
aluminium resin	cocoa	gypsum
fertilisers (certain)	coffee beans	silica
glass beads	corn	talcum powder
nylon polyer chip	fishmeal	tri-poly phosphate
polyester granules	flour	vanadium slag
polyethylene granules	ground nuts	aluminium fluoride
polycarbonate granules	lentils	bleaching earth
polypropylene granules	milk powder	zeolite
PVC powder and granules	mixed grain feed	cement
PTA	nuts	
soda ash	peas	
catalysts (certain)	rice	
PE resin	salt	
PP resin	seeds	
PS resin	soya beans	
pigments	starch (certain)	
zinc powder	sugar	
detergents	tea leaf	
	wheat
